

Water Control Hubs:

Price starts at \$935

The Water Control Hub, Model WC-0101-W is a satellite of the *PowerTraker* and can be used to control up to six solenoids and record flow measurements from up to six Badger Model 25 water meters. This hub allows the user to turn the water supply on and off directly from a computer or cell phone browser or automatically based on time of day and/or sensor conditions. Water use and sensor data is collected and logged for analysis.

Communication with the *PowerTraker* can be hard wired or wireless. Water meters sold separately.

Other Water Control Hub models are available.
